Lightweight, Economical Metallic Alternative

• **Economical and Easy to Install**
• **Expands up to 150%**
• **Halogen Free**
• **Conductive Mylar® for Shielding Applications**

When your needs don't require the durability or toughness of our CH or CX sleeving, FLEXO MYLAR® (MYN) is an ideal, economical alternative. MYN is perfect for cosmetic applications, and a wide variety of installation methods create dramatic results.

Audiophile cable builders often use MYN under other sleeving types to create a unique, custom visual effect. Applications that combine MYN with a more robust sleeving will withstand abrasion and general use and still have the custom, "Wow!" effect cable fabricators are looking for.
Braided from thin metallic Mylar® strips along with transparent PET monofilament, MYN creates a sparkling, highly reflective effect. MYN can be used instead of Mylar® sheets to wrap and bundle cables.

Spectacular highlights and unique visual effects are achieved when Mylar is combined with other sleeving types.

Light weight and economical make MYN an ideal product for designing and tying fishing lures of all types and sizes. Several world records have been set with lures constructed with Techflex sleeving.
