

## *Electronic Fasteners, Inc.*

*"Experts in Fasteners - Excellence in Service"*

### Supplier Certification for products regulated by China RoHS1 and China RoHS2: June 19, 2021

Electronic Fasteners is monitoring the product related environmental legislation activities in China and is fully aware of the labeling law (SJ/T 11364-2006) signed into force by the Ministry of Industry and Information Technology (MIIT) of the Chinese government. The statute sets forth the requirements for labeling all electronic information products sold in China.

Under Section 4 (General Rules), the law states that "for electronic information products purchased for use as components in production, it is fine for the supplier not to perform the markings on provided product." As a supplier of components that are used in production, Electronic Fasteners will comply with the law and is not required to provide labeling on our products.

Section 4 of the law continues with, "but the supplier must provide the purchaser with all the information needed for marking." Upon request, Electronic Fasteners will provide customer the information needed to fill out hazardous substance tables for their products.

This table lists the thresholds set for material compliance:

<b>Substance</b>	<b>Maximum Control Value</b>
Lead and its compounds	0.1% by weight (1000ppm)
Mercury and its compounds	0.1% by weight (1000ppm)
Cadmium and its compounds	0.01% by weight (100ppm)
Hexavalent Chromium and its compounds	0.1% by weight (1000ppm)
Polybrominated Biphenyls (PBB)	0.1% by weight (1000ppm)
Polybrominated Diphenyl Ethers (PBDE) (include Deca-BDE)	0.1% by weight (1000ppm)

Per the China RoHS regulation update in March 2016, all parts and products that must be in compliance will be products manufactured with date codes after the official enforcement date of July 1, 2016.

The requirement for marking and disclosure tables is only necessary for sales to end customers of end products, for example finished goods. Electronic Fasteners does not fall into this category.

We will continue to work with our suppliers to identify any potential use of materials as specified in the China RoHS regulation and ensure this compliance statement remains accurate. We reserve the right to amend this statement at any time based on subsequent developments or information.

More information regarding the regulation can be found at [www.chinarohs.com](http://www.chinarohs.com).

Should you have any questions or concerns regarding this statement, please do not hesitate to contact us.
